

PROFESSIONAL VOICE RECORDERS

Professional VOICE RECORDERS with SLEEP technology for long-term recording.

The unique and patented POWER SLEEP technology allows these devices to last for long periods when there is no sound or talk in the room. As soon as the sound ends, the device ends the recording so far and enters SLEEP mode, and almost completely turn OFF battery consumption. As soon as the sound appears, the device wakes up and starts recording again.

- Battery life in SLEEP mode 2000-6000 hours (3-8 months), depending on model
- Battery life in recording mode 75-300 hours (depending on model)
- MP3 recording format (128kbps)
- ALC preamplifier for superb recording even quiet conversations
- Each recording is in a separate file
- Each recording has a date and time stamp
- Special PC software for adjusting recording quality, the sensitivity of activation to sound, and date and time
- BLACK BOX design, without any marks on the device for complete discretion
- Encrypted USB Charging and Listening Cable - if unauthorized person finds a device, he cannot charge or download recording material

- Made in EU
